TCW

## Sub-Fund Size

US\$ 227.81 Million

## Net Asset Value

US\$ 1,097.34

## Risk Level

## Investment Objective & Philosophy

The Sub-Fund seeks to maximize long-term total return by investing mainly in investment grade fixed income securities.

It invests in various types of bonds and other securities, typically corporate bonds, notes, collateralized bond obligations, collateralized debt obligations, mortgage-related and asset-backed securities, bank loans, money-market securities, swaps, futures, municipal securities, options, credit default swaps, private placements and restricted securities. These investments may have interest rates that are fixed, variable or floating. The Sub-Fund invests in the U.S. and abroad, including emerging market countries, and may purchase securities of varying maturities issued by domestic and foreign corporations and governments.

## Benchmark Index

Bloomberg Barclays U.S. Aggregate Bond – A market capitalisation-weighted index of investment-grade, fixed-rate debt issues, including government, corporate, asset-backed and mortgage-backed securities, with maturities of at least one year. The Index is not available for direct investment; therefore its performance does not reflect the impact of fees or expenses incurred in managing a portfolio. The securities in the index may be substantially different from those in the Fund.

## Risk

The Risk Level Indicator on the first page suggests the relationship between risk and potential returns when investing in the Sub-Fund. This Share Class has a ranking of 3, which indicates that there is typically a moderate risk for up and downturns in the net asset value. This ranking is typically used to indicate a level of risk that is greater than other Sub-Funds that invest in assets such as bonds issued by organizations with high credit quality domiciled in developed markets, but less than Sub-Funds that invest in assets such as equity. Historical data, such as is used in calculating the Risk Level Indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. Category 1 does not mean a risk-free investment.

The following risks are materially relevant to the Sub-Fund but are not adequately captured by the Risk Level Indicator and may cause additional loss: **Liquidity risk** refers to the possibility that the Sub-Fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to the Sub-Fund. **Credit risk** refers to the likelihood of the Sub-Fund losing money if an issuer is unable to meet its financial obligations, such as the payment of principal and/or interest on an instrument, or goes bankrupt. **Counterparty risk** refers to the fact that individually negotiated or over-the-counter derivatives, such as swap agreements or currency forwards, are subject to counterparty risk, which is the risk that the other party to the contract will not fulfill its contractual obligations, which may cause losses or additional costs to a Sub-Fund. **Cross-liability risk**: While there is no cross-liability between Sub-Funds under Luxembourg law there can be no assurance that such provisions of Luxembourg law will be effective in other jurisdictions. There is cross-liability between Classes of the same Sub-Fund. **Operational risk** refers to a failure or delay in the systems, processes and controls of the Sub-Fund or its service providers (including all safekeeping of assets) which could lead to losses for the Sub-Fund.
