## About us

"Quoniam is an engineering-driven investment boutique and a pioneer in quantitative asset management

– made in Germany."

## Strategy

The Quoniam Dynamic strategy offers active and integrated multi-factor investing. Our unique approach enables us to systematically exploit market inefficiencies across the investment universe to generate alpha potential. In order to maximise alpha, we select stocks based on active and integrated multi-factor investing. Our investment decisions ground on a comprehensive analysis of the fundamental risk and return characteristics of companies and their relative attractiveness. By means of 50 financial metrics, we identify multiple factor premia (Value, Quality and Sentiment) for alpha generation. Through the coverage of the entire investment universe we are able to identify attractive investment opportunities in small- and mid-caps to implicitly exploit the Size premia as well. The strategy aims to achieve a good balance between alpha (outperformance) and tracking error. The investment universe comprises 3,000 European stocks.

## Performance (net of fees)
