## Index

**Bloomberg Barclays U.S. Aggregate Bond** – A market capitalisation-weighted index of investment-grade, fixed-rate debt issues, including government, corporate, asset-backed and mortgage-backed securities, with maturities of at least one year. The Index is not available for direct investment; therefore its performance does not reflect the impact of fees or expenses incurred in managing a portfolio. The securities in the index may be substantially different from those in the Fund.

## RISK

The Risk Level Indicator on the first page suggests the relationship between risk and potential returns when investing in the Sub-Fund. This Share Class has a ranking of 3, which indicates that there is typically a higher risk for up and downturns in the net asset value. This ranking is typically used to indicate a level of risk that is greater than other Sub-Funds that invest in assets such as bonds issued by organizations with high credit quality domiciled in developed markets, but less than Sub-Funds that invest in assets such as equity. Historical data, such as is used in calculating the Risk Level Indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. Category 1 does not mean a risk-free investment.

Fixed income investments entail interest rate risk, the risk of issuer default, issuer credit risk, and price volatility risk. Funds investing in bonds can lose their value as interest rates rise and an investor can lose principal. Mortgage-backed and other asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. MBS related to floating rate loans may exhibit greater price volatility than a fixed rate obligation of similar credit quality. With respect to non-agency MBS, there are no direct or indirect government or agency guarantees of payments in pools created by non-governmental issuers. Non-agency MBS are also not subject to the same underwriting requirements for the underlying mortgages that are applicable to those mortgage-related securities that have a government or government-sponsored entity guarantee.
