About us

Quoniam is an active quantitative asset manager founded in Frankfurt am Main, Germany. We have successfully applied our investment philosophy for 20 years. Based on our scientific approach, we strive to deliver first-class performance results for our institutional investors.

Strategy

The Quoniam Dynamic strategy offers active and integrated multi-factor investing. Our unique approach enables us to systematically exploit market inefficiencies across the investment universe to generate alpha potential. In order to maximise alpha, we select stocks based on active and integrated multi-factor investing. Our investment decisions ground on a comprehensive analysis of the fundamental risk and return characteristics of companies and their relative attractiveness. By means of 50 financial metrics, we identify multiple factor premia (Value, Quality and Sentiment) for alpha generation. Through the coverage of the entire investment universe we are able to identify attractive investment opportunities in small- and mid-caps to implicitly exploit the Size premia as well. The strategy aims to achieve a good balance between alpha (outperformance) and tracking error.

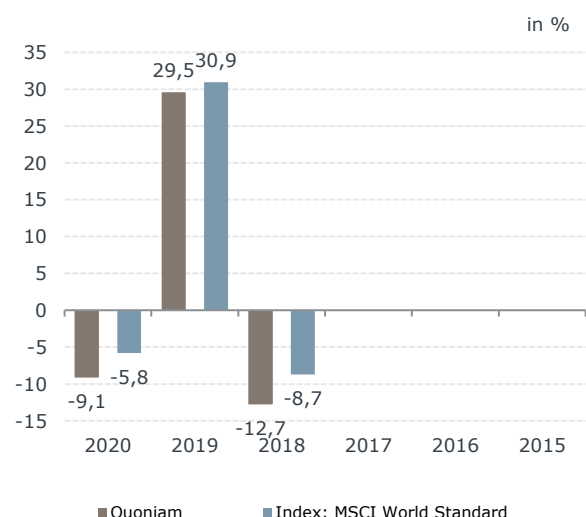

The investment universe comprises 10,000 stocks worldwide.

Performance (net of fees)

Time period	Quoniam	Index
1 month	2.00%	1.66%
ytd	-9.09%	-5.79%
1 year p.a.	1.06%	4.28%
3 years p.a.	-	-
5 years p.a.	-	-
Since inception p.a.	1.31%	5.87%

Total Carbon Footprint

Fund	Benchmark	Difference	Reduction (%)
101.0	157.1	-56.1	-36

Carbon Footprint: weighted average carbon intensity measured in T of CO₂ equivalents per million of USD revenues. The indicator is the sum of Scope 1 (direct emissions) and Scope 2 (indirect emissions that result from the consumption of electricity purchased by the company). The portfolio Carbon Footprint is a value-weighted average of the holdings in the portfolio. All figures are weighted over the whole reporting period.
